Snow Mutant Battles - Lite Paper

SMB team

Q2, 2023

Contents

1 Executive Summary

This Lite paper outlines our vision of the 'Snow Mutant Battles gaming platform coupled with a brief explanation of plans for the future of the platform. The team is excited to finally release our product and to see the implementation of if in the real world.

2 Overview

Snow Mutant Battles (SMB) is a revolutionary blockchain-based gaming ecosystem that combines the worlds of Player vs Player (PvP) combat and Play-to-Earn (P2E) mechanics to create the ultimate gaming experience. Built on Ethereum, SMB pioneers an immersive experience where players can own, battle and trade NFTS, whilst receiving rewards through in-game activities such as NFTs, and token transfers.

The cornerstone of the ecosystem is the Snow Mutant Battles Token (SMB), which serves as the primary currency for all in-game transactions, and rewards. The token incorporates a 5% tax on each buy and sell transaction, with the proceeds directed towards the marketing wallet, in turn supporting the continuous growth and development of the platform.

3 Partnerships

The SMB team possesses a wide-ranging and varied expertise, which has fostered an optimistic outlook for our future collaborations, further reinforced by our numerous ongoing discussions.

Await further updates...

4 Tokenomics

The SMB project has designed a unique tokenomics structure which will directly aid in the gaming platform whilst reducing extreme fluctuations tokens may experience during early stages of its life. With a 5% buy and sell tax, SMB aims to create a balanced and thriving environment for all stakeholders whilst ensuring the expansion and increasing the incentives for use of the gaming platform.

Here's an overview of the tokens structure:

5% Buy Tax: When a user buys SMB tokens, a 5% tax is applied on the transaction. This tax is distributed as follows:

a. 2% P2E: 2% is allocated towards a wallet which will be used to implement P2E mechanics.

b. 2% Liquidity Pool: 2% is added to the LP

c. 1% Project Development: The remaining tax portion is allocated to the project's development fund, which will be utilized to expand the SMB ecosystem, develop new features, and maintain the platform.

5% Sell Tax: When a user sells SMB tokens, a 5% tax is applied on the trans action. This tax is distributed as the Buy tax was distributed.

By implementing a 5% buy and sell tax, this structure encourages long-term holding, supports a stable market, and ensures continuous development and growth of the SMB platform.

4.1 Play-to-Earn Mechanics

A quintessential feature of SMB is the Play-to-earn mechanisms that will power the games first users, setting the foundation for a strong community of consistent battlers. This will allow players to earn rewards in the form of SMB tokens as they participate in various in-game activities monetising their gaming experience.

P2E mechanics in Snow Mutant Battles include:

- Winning PvP battles: Players earn SMBT tokens as rewards for defeating opponents in PvP combat.

- Participating in tournaments and special events: Players can earn tokens by competing in organized events and achieving high rankings on leaderboards.

- Fusion of Snow Mutants: When players burn their NFTs to create more powerful characters, they can earn tokens as a reward for contributing to the ecosystem's growth.

- Daily and weekly challenges: Players can complete various tasks and objectives to earn tokens and other in-game rewards.

- Staking and liquidity provision: Players have the option to stake their SMBT tokens or provide liquidity to supported pools, earning additional tokens as passive income.

These P2E features create an engaging and rewarding gaming experience, attracting initial players whilst ensuring the long-term sustainability and growth of the Snow Mutant Battles ecosystem.

5 Road map

The Snow Mutant Battles development team has outlined an ambitious roadmap for the project, which includes the following milestones:

- Q2 - 2023: Concept Development, Litepaper, and P2E Mechanics

Design • Q2 - 2023: SMBT Token Presale and Listing

- Q3 - 2023: Development of the Snow Mutant Battles Mobile App
- Q4 - 2023: Launch of the Snow Mutant Battles Platform with P2E Features, coupled with publication of White Paper
- Q1 - 2024: Expansion of In-Game Features, P2E Mechanics, and Global Marketing Campaign

6 Conclusion

Snow Mutant Battles represents the next generation of blockchain-based gaming and our team is optimistic about the future of the SMB ecosystem, and continually looks forward to the release of our full ecosystem.
